
APPENDIX D – PHOTO LOG

UXO Technicians conducting Visual Survey with Analog Instruments operations

UXO Technicians conducting Visual Survey with Analog Instruments operations within Stony Creek

UXO Technician along the slope of Second Mountain

UXO Technicians conducting Analog Instruments operations

UXO Technicians conducting Visual Survey with Analog Instruments operations along the Second Mountain

UXO Technicians conducting Visual Survey with Analog Instruments operations along the ridge line of Second Mountain

50-foot by 50-foot grid layout for DGM activities

Geophysical Specialist conducting a grid sweep

DGM equipment

Technician placing metal seed with grid for QA/QC purposes

Geophysical Specialist explaining DGN equipment to USACE Representative

Geophysical Specialist conducting post-operations QA check for DGM equipment

Geophysical Specialist conducting land surveying operation

Geophysical Specialist conducting land surveying operation

Survey contractor establishing benchmarks for DGM grids

Geophysical Specialist conducting land surveying operation

Geophysical Specialist establishing benchmarks for DGM grids

UXO Technician investigating possible munitions during mag & dig operation

UXO Technicians investigating possible munitions during mag & dig operation

UXO Technicians and Geophysical Specialist placing QA/QC seeds in the geophysical system verification test strips.

UXO Technicians assembling material to construct demolitions structure for blow-in-place (BIP) operations

UXO Technicians assembling material to construct demolitions structure for blow-in-place (BIP) operations on the ridge line of Second Mountain
