
APPENDIX A – EOD REPORTS

These data were exported from a combination of 5 separate database files, each file providing data for a Mission year from 1996 to 2000. The separate years have slightly different database structures, and only common fields. Also the data were selected based on State = PA, and City = Annville or FTIG or some variation on those. A few other records outside those "Cities" were included based on coordinates placing the item near FIG. A number of data columns are hidden which are less relevant to the MMRP issues, to simplify viewing. The "Support for" and the "Narrative" columns are usually key to understanding the type of munition(s) managed.
